Soukaina Daali

Big Data & Artificial Intelligence Engineer

+212 680-952598 soukaina.daali@edu.isga.ma Based in Rabat, Open to relocate worldwide

soukainadaali github.com/soukainadaali soukainadaali.github.io

Profile

Interested in the academic world and driven by a constant desire to learn, I plan to pursue a research-oriented career. Currently, I am looking for an end of studies research internship (PFE) in Data Science and Machine Learning.

Education

State Engineer in Big Data and Artificial Intelligence, ISGA Rabat, Valedictorian for 3 consecutive years
2022 – 2027 | Rabat, Morocco

Baccalaureate in Physics and Chemistry), Imam Al Bokhari (Highest Honors)
2021 – 2022 | Temara, Morocco

Skills

Programming Languages — Python, Java, SQL, PL/SQL

Machine Learning & Deep Learning — Scikit-learn, PyTorch, TensorFlow

Data Analysis & Engineering — Pandas, NumPy, Hadoop (HDFS, MapReduce), Apache Spark

MLOps & Cloud — Docker, Microsoft Azure

Visualization & BI — Matplotlib, Seaborn, Power BI

Databases — MySQL, Oracle Database, NoSQL

Soft Skills — Communication, Leadership, Teamwork, Critical Thinking, Problem Solving

Certificates

- ETS | TOEFL iBT (5.5/6)
- Orange ODC | Machine Learning
- Coursera | Data Analysis Using Pyspark
- Oracle | Oracle Cloud infrastructure AI Foundations Associate

Languages

Arab: Native | **English:** C1 | **French:** C1

Extracurricular Activities:

- President and Founder of the Debate and Public Speaking Club - Agora Circle
- Delegate and Organizer of the African Cultural Day of Morocco

Professional Experience

Smartovate,
MLOps Engineer Intern, London, UK | Remote
07/2026 – 08/2026 | London, United Kingdom

- Built an end-to-end MLOps pipeline on Azure ML (SDK v2, MLflow, Docker) for LSTM anomaly detection on NASA SMAP/MSL spacecraft telemetry, covering hyperparameter sweeps, F1-gated model registration, and blue/green batch deployment.
- Chose F1 over validation loss as the model-promotion criterion after the best-validation-loss configuration scored worse on F1, and registered models directly from job outputs to preserve lineage.
- Automated retraining and scoring with an event-driven orchestrator.

Aditya International, Web Development Intern, Casablanca, Morocco | Hybrid
08/2024 – 09/2024 | Casablanca, Morocco

- Executed end-to-end testing for a full-stack application (React.js, Laravel, MySQL), identifying critical bugs and documenting comprehensive technical anomaly reports.
- Managed version control and collaborative workflows utilizing Git and GitHub to ensure code integrity and streamlined development cycles.
- Optimized database integration within the application architecture, handling complex data manipulation and schema implementation using MySQL.

Projects

Automatic Detection of Respiratory Pathologies via Deep Learning
Classification of pulmonary sounds (normal, crackle, wheeze) via CNN ResNet50V2 on Mel spectrograms
Technologies: Python, TensorFlow/Keras, librosa

Aviation Risk Prediction
Classification system for aviation accident severity (NTSB + NOAA, 28,810 entries) with conformal uncertainty quantification.
Technologies: LightGBM, MAPIE, SHAP, Flask, MongoDB, React.js

Customer Churn Prediction
Development of an end-to-end churn prediction pipeline, aimed at helping companies proactively identify customers at risk of leaving.
Technologies: Python, VS Code, PowerBI
